

SAFETY MANAGER COURSE

FOR HYPERBARIC PERSONNEL

After a very successful 1st Safety Manager course in 2017 at Porto
it is our pleasure to invite you to our

2ND SAFETY MANAGER COURSE

IN BARCELONA, SPAIN FROM OCTOBER 2-4, 2018.

This 3 day course (from 09.00-17.00 each day) is designed to provide experienced hyperbaric personnel with the knowledge and skills needed to fulfill the criteria for the role of the Safety Manager.

The curriculum includes classroom instructions and practical exercises.

Admission criteria

The requirements are completion of an introductory course in Hyperbaric Medicine and working experience in facilities that deliver Hyperbaric Oxygen Therapy. Applications are therefore considered from physicians, nurses, operators and technicians. Priority will be given to nurses and operators that have already been certified under the EBAss/ECB scheme of ECHRN and ECHCO.

Objective

The course's objective is to prepare the participant for the role of the Safety Manager in Hyperbaric facilities. Main points of the role are based on a "Global" approach to management of safety and education within the team, including:

- the implementation of effective Safety Management and Quality Assurance systems with the use of guidelines, clinical protocols and internal audits that comply with local, national and European directives as well as with evidence based practices.
- the application of risk assessment and incident/accident reporting procedures within the Hyperbaric Centre.
- the acceptance and monitoring of effective education programs; including requirements for Clinical Practice Development of the hyperbaric team.

Course Description

This 3-day course (from 09.00-17.00 each day) is designed to provide experienced hyperbaric personnel with the added knowledge and skills needed to fulfil the criteria for the role of the Safety Manager.

The emphasis will be on the review of European Norms that are related to hyperbaric technology (e.g. EN 14931, EN 14971, EN 16081), presentation of the European Code of

Good Practice with reference to clinical practice, staff and patient education, infection control policies, firefighting systems and strategies, documentation, risk analysis and general principles in safety management such as safety culture.

Language

The official language of the course is English.

All study material as well as exams will be given in English.

There will be support offered by Spanish speaking personnel for those who require clarification of points.

Course location

Location – Barcelona

Lectures and Practical sessions will take place at the Hospital Moises Broggi

Dates

2-4 of October 2018
