EBAss maintains the following committees:

- ✓ **Safety;** Ensuring appraisal of safety related advances in the field of Hyperbaric Oxygen Therapy.
- ✓ **Education;** Formulation & implementation of European Hyperbaric Standards in training & education.
- ✓ **Communication;** Providing a dynamic hyperbaric network for effective communications between members, facilities and the industry.
- ✓ **Accreditation;** Providing an accepted route for professionals and facilities to attain internationally recognized qualifications in the baromedical field.

EBAss

Within the Law of 2nd May 2002, an international non profit association with scientific purpose has been set up under the name of European Baromedical Association for Nurses, Operators and Technicians, i.e, EBAss. Since 2021 the European Baromedical Association (EBAss) has been a UK Registered Charity (1183525).

Mission Statement

The main mission of EBAss is to encourage integration of Baromedical personnel in all European baromedical centres by working towards standardization of education throughout Europe while supporting and encouraging a safe approach in our daily practices and improving methods of communication.

EBAss will aim to:

- Promote networking and information exchange
- Standardize clinical practices and policies
- Formulate recommendations for training and education
- Advice on Safety issues in hyperbaric and diving related practices
- Certify a high level of professional competency
- Accredite high standards of educational programmes
- Encourage research and publishing

Training centres:
